

Sample Turnaround Time Guidelines

Eastern Analytical, Inc. consistently provides RUSH Sample Turnaround Times.

Priority Service Surcharge Guidelines

	<u>24 Hour TAT</u> ¹	<u>2-4 Day TAT</u> ¹	<u>5-10 Day TAT</u>
VOC	100%	50%	none
Extractable Organics	100%	50%	none
Metals	100%	50%	none
Wet Chemistry	100%	50%	none
Full TCLP	NA	50%	none

¹ ***Please call us 24 hours (or more) in advance to schedule RUSH WORK.***

Turnaround Time (TAT) is the number of working days **from the date Eastern Analytical receives the sample** to when the preliminary data is faxed or e-mailed. Preliminary data will be available by the end of day on the date due unless other arrangements are made ahead of time. A final hard copy report, invoice and EDD will then be processed.

If a specific date or time is needed for results, please write the date and time (rush or non-rush) needed on your chain of custody.

Please refer to the discounted price column on your price list for the specific parameter and apply the appropriate surcharge above to that price. Discounts **do not** apply to subcontracted work.
